

Rapid Advance & Retract Pneumatic Soft Touch System (for NFPA & Metric Cylinders)

" A Cost Effective Motion Transfer System For Special Applications ! "

Long Stroke Cylinder
shown with
Speed Reduction
& Soft Touch Load Limiters
on both the
Head and Cap Ends

Peninsular's
Speed Reduction
& Soft Touch
Load Limiters
Effectively Control
Rapid Cylinder Travel !

- Effectively controls rapid cylinder travel while moving heavy objects (weighing up to 3,000 lbs) for distances of up to 15 feet while moving at speeds of up to 5 feet per second
- Replaces ball screw actuators and other more costly hydraulic & electronic linear motion transfer systems including rack and pinion devices
- Cylinder travel speed can be adjusted while the cylinder is in motion in either direction
- In the event of power failure, the decell mechanism will engage as a safety feature
- All NFPA & Metric cylinder mounting styles are available
