Peninsular’s team of Fluid Power Experts have the capability & flexibility to address your toughest applications and your specific requirements for Special Cylinders - NPFA, Metric & Non-Standard Cylinders!

**AIR-OIL TANKS**

The Peninsular Air-Oil Tank offers a means of smooth hydraulic speed control of a cylinder from an air line source. In addition, they may be used to prefill a circuit or for low pressure advance of a work cylinder.

**PISTON TYPE BOOSTERS**

The Booster version of this design provides an economical means of intensifying pressure and may be used in applications similar to the Peninsular ram type booster.

**SINGLE PRESSURE BOOSTER**

The Peninsular Single Pressure Booster furnishes intensified pressure throughout its entire stroke. Recommended for short work cylinder applications or static test setups.

**DUAL PRESSURE BOOSTER**

The Peninsular Dual Pressure Booster is used for low pressure approach stroke and high pressure work stroke. Recommended for applications when the work cylinder has a long stroke not requiring high optional pressure until it reaches the working portion of its stroke.

**SPEED CONTROLLED TANDEM CYLINDERS**

Peninsular speed controlled Tandem cylinders provide an easy means for smooth hydraulic cylinder operation. Power is supplied by simple and obtainable shop-air. The cylinder is compact and shipped with the oil makeup unit attached to the cylinder. Other tandem intensification cylinders are also available. Optional plumbing inclusive of flow control valve/or check valve is available.
