

Most of you may have heard or read that Michigan Governor Gretchen Whitmer issued a “stay at home” order, which has affected the ability to commute to places of employment, churches, entertainment venues etc. In accordance to the “Cybersecurity and Infrastructure Security Agency” as assigned by the Homeland Security Act of 2002, Peninsular Cylinder Company is to be considered an “essential manufacturing operation” due to its diverse customer base which is critical to the U.S. infrastructure.

Consequently, we will continue to maintain normal business hours until we are instructed otherwise.

For the safety of our employees, we are adhering to the guidelines and advice of the Federal, State and Local governments.

On a personal note, I trust that the powers to be are deploying all resources to keep our livelihood and well-being intact as well as our economic environment and I pray that all persons that are or can be affected by COVID -19 a speedy recovery with no long term affects.

Sincerely,

Henry Haver
President/General Manager
Peninsular Cylinder Company
